# 01 Introduction

**Influx token is the first binance-based impactful fundraising platform and a project accelerator, designed to leverage DeFi innovations to provide transparent, efficient, and fully decentralized humanitarian services.** Unlike other fundraising platforms, Influx token will provide full support to communities or countries faced with extreme hunger, starvations, covid-19, climate change, draught, menstrual equity and digitized technology for online schooling through the funds generated from the sales of influx native tokens \$INFL and a suite of advanced DeFi tools partnerships with other NGO and NFT projects that need to thrive and prosper.

Influx token is set to become an integral part of the binance smart chain ecosystem, which was founded by CZ binance and is already widely known as the fast network for transactions. As soon as Influx launches its smart contract on pancakeswap (scheduled for Q4, 2021), it will build an ecosystem of core team outreach units and marketing taskforce which will offer impactful investing profits to INFL holders and financial support during communities during outreach that will likely make influx token the next go-to destination for impactful investing.

Led by a team of experienced DeFi and traditional finance professionals, Influx token is set to implement market-leading capabilities tailored for binance-based projects and the ecosystem's users. As a proof of this concept, we have already developed a centralized solution. Our next-generation decentralized NFTs will be built according to the best DeFi industry practices, ensuring real-time settlement, top-notch security, interoperability, true decentralization, zero counterparty risk, while also being fully scalable to meet the needs of institutional investors

Unlike other fund raising and impactful investing projects, Influx native tokens supports binance chain network as well as a suite of project kickstarting and endorsement capabilities to meet modern projects need.

For our holders and investors, we also provide rewards of up to 1023% on staking and up to 5000% additional return on liquidity adding or endorsed partnership projects. Users are invited to browse through our verified project listings, meet project founders, and endorse the most credible ones. The credibility of projects is vetted by well-informed investors, as well as the platform's due diligence team before the propositions are released to our users. Influx token seeks to ensure cost-effective and timely fundraising to support humanitarian needs and for projects, lending legitimacy and credibility to their future success. In looking out for the interests of our investors, Influx token ensures that only the most credible and promising projects make it through — the ones with the highest potential to make a meaningful contribution to the influx project, community and ecosystem.

# Vision

Everything we do is governed by a philosophy of decentralization funds raising and distributed directly to projects and communities in need of humanitarian needs, tokens purchased are sent directly to the personal wallets of users without burdensome checks or unnecessary delay. We also take financial sustainability and inclusion seriously, working diligently to ensure that our efforts benefit all stakeholders, helping to evolve the reputation and maturity of the DeFi industry.

## 03

# PROJECT overview

**Be among the first contributors to the most promising crypto & blockchain based humanitarian service project.**

Live up to the hype of being an early investor to a unicorn-level project. Browse through influx token and project outline, buy, stake and add liquidity to this best impactful investing and get in early. The earlier you can jump in, the higher is

the potential reward. Other platforms tend to list projects and their native tokens after the initial rounds of presales have been completed.

Influx token invites our members to join early and reap the associated high-grossing benefits in the future. Funding your project and securing your running funds and investments is one of the hardest barriers one must face as an entrepreneur. Meanwhile, staying safe, avoiding scams, and phishing attempts are some of the most frequently occurring problems cryptocurrency investors must overcome. Luckily, influx token solves all of that and is a natural development of the crypto fundraising process to address humanitarian needs. The structure follows a similar pattern to the IEO. Yet the key difference is that both the entrepreneur and the investors conduct their transactions through a third-party decentralized platform.

There are numerous securities of funds, project awareness, fraud prevention and immediate token listing benefits associated with conducting an IDO instead of an ICO - and project owners are seeing them clearly. Internal due diligence department will carefully select the most promising and legitimate start-ups looking for financing. Influx will host the IDO of these projects to keep providing its community with the best deals in the market. Influx is eagerly collaborating with start-up incubators and accelerator hubs as well as always keeping open ears to its partner and community network. The end goal is to identify and contact new companies with the highest upside potential within the binance Ecosystem. Influx is going to host both utility and security token IDOs. Besides the most popular payment methods of ADA, ETH and supported stable coins, Influx will allow IDO contributions in native INFL token at a priority which will add a supplementary utility for the token.

# Features

## **Influx Native Tokens**

Become one of the early birds within the influx Ecosystem

## **Project Endorsements**

Ability to support your favorite projects and gain rewards

## **No private sale options**

Facilitate various types of fundraising phases and prevents token dump.
